1 - Flight Reservation System Using SaaS

Aim: To create a cloud-based Flight Reservation System demonstrating Software as a Service (SaaS).

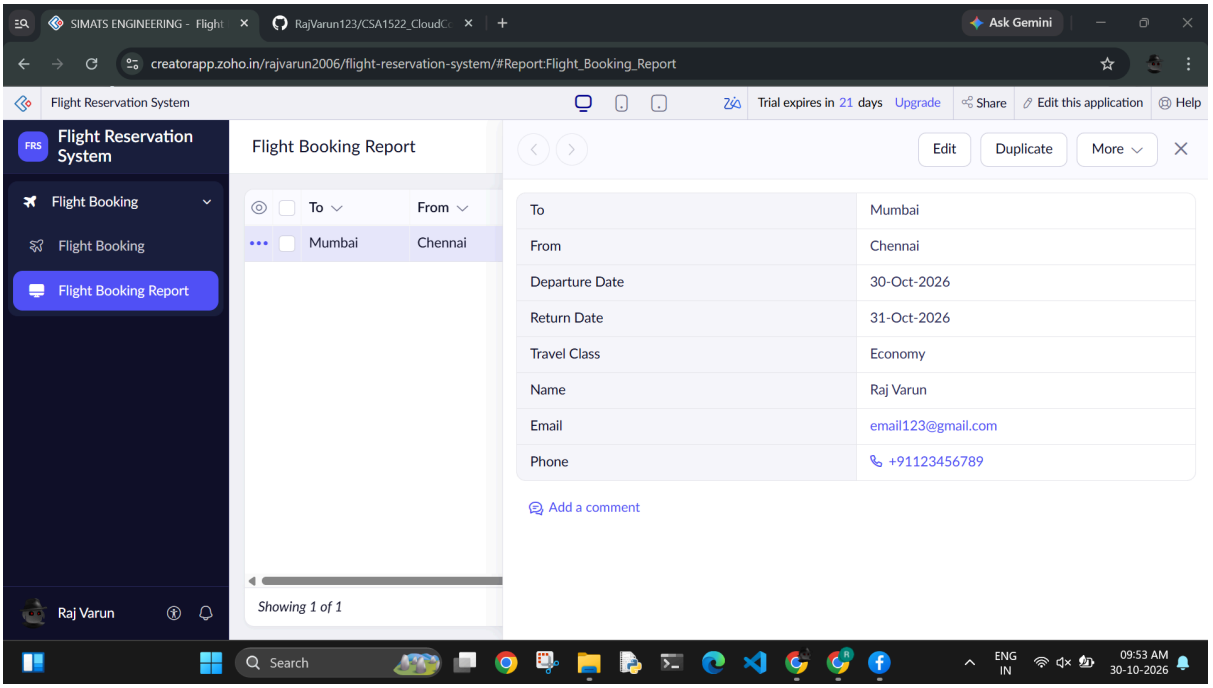

Algorithm:

1. Open the cloud application.
2. Enter travel details (one-way/round-trip, source and destination).
3. Select departure date, travellers, class and fare type.
4. Choose domestic or international flights.
5. Display available flights and reservation details.

Input:

Output:

Result: Thus, a cloud-based Flight Reservation System was created and successfully demonstrated using SaaS.
